MEVASA: 45 years of innovation, quality, and commitment

With more than four decades of experience, **MEVASA** has established itself as a leader in the manufacture of high-performance geotextiles for use in civil engineering, construction, and environmental protection projects.

We manufacture our products with a 100% focus on quality, efficiency, and durability, ensuring solutions that adapt to the most advanced technical demands.

At **MEVASA**, we don't just design materials. We create sustainable, safe, and customized solutions for those who build the future.

About the Company

MEVASA GEOTEXTILES

The company's origins date back to 1979, when its business was based on the manufacture of fabrics for quilting in clothing, and semi-worsted nap fabrics for spinning.

Thanks to the technological knowledge acquired, **MEVASA** has evolved and invested in the development of new products and technologies, adapting daily to changing customer needs and supplying materials that meet quality standards in manufacturing, control, and application.

Today, **MEVASA's** product range includes a wide variety of needle punched nonwoven felts and nonwoven fabrics designed according to customer demand and specifications, with a wide variety of characteristics and for use in various industrial and commercial applications.

About the Company

+ Vision & mission

Satisfy our clients who seek excellence, offering innovative and personalized solutions. We are committed to sustainable alternatives in product development, actively contributing to a more responsible and efficient sector.

To be a benchmark of quality and commitment, both social and environmental, promoting business practices that generate a lasting positive impact.

+ Core values

Honesty: we act with transparency, responsibility and coherence.

Perseverance: learning and investing for continuous improvement.

Teamwork: We believe in collaboration, trust and the sum of talents.

Passion: We have enthusiasm and vocation in each project, connecting with our work and our people.

Commitment to QUALITY

Our commitment to quality has not only been valued nationally, but our products are export in different countries around the world:

- The **main objective** is to satisfy in its maximum expression the expectations that the customer has of our product.
- The **customer** is the one who defines the quality requirements for their specific use, knowing how to adapt to their needs.
- All our raw **materials** are subjected to quality examinations and analyzes.
- The **relationships with our customers and suppliers** are characterized by cooperation and open communication, we are committed to responding enthusiastically and professionally to any need expressed by them.

Sustainability - Our future begins with making the right decisions today.

In **MEVASA** we take care of the environment, the use of natural resources, the people who work with us and society in general very seriously. We are aware of the importance of social and environmental responsibility, which is why we reaffirm every day our commitment to sustainable development and the circular economy. Our obligation is to know how to identify those responsibilities in social, environmental and economic matters to ensure an optimal quality of life for both the current and future generations.

Committed to people and their environment - Circular Economy and Recycling.

MEVASA takes the principles of the circular economy as its work philosophy. Currently, all our production is developed, as far as possible, according to these principles. Returning products to their life cycle is our priority. In this way, we reduce the accumulation of waste in landfills and obtain products without the need to deplete natural resources.

Environment and Energy

Protecting the environment is essential to us. Every day we try to improve our methods and facilities by establishing controls, looking for new applications for the reuse or recovery of our waste and investing in technological improvements that benefit the environment. We demand the same from our suppliers, ensuring that their manufacturing processes are respectful with the environment and fall within the wheel of the circular economy.
